PROFESSIONAL SUMMARY

Technical Lead Developer with **7+ years** of experience building enterprise-scale platforms, analytics tools, and cross-platform applications. Specialized in **Angular, React, TypeScript**, and **frontend architecture**, with a strong focus on performance optimization and design systems. Leads AI-assisted development adoption using tools like **GitHub Copilot** and **Claude** to enhance engineering productivity and efficiency. Proven track record of leading engineering teams and delivering scalable, high-performance solutions in agile environments.

SKILLS SUMMARY

- **Frontend:** Angular, React, React Native, Next.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind, D3.js, AmCharts, Material UI, PrimeNg
- **Backend & APIs:** Node.js, Express, GraphQL, REST APIs, .NET
- **Cloud & DevOps:** AWS, Docker, Jenkins, CI/CD Pipelines
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL Server
- **Tools & Platforms:** Git, Nx Monorepo, Storybook, Elasticsearch, Cypress, Jest

CORE COMPETENCIES

- Frontend Architecture & Scalable Systems
- Performance Optimization & API Efficiency
- Enterprise SaaS Platforms
- Financial Data Visualization
- CI/CD & Developer Experience

EXPERIENCE

Eckler

Oct 2023 - Present

Technical Lead Developer

Toronto, ON

- Led a cross-functional engineering team of 7 as Technical Lead and **Scrum Master**, driving **architecture decisions**, **sprint delivery**, and technical direction.
- Champion the adoption of AI-assisted development (**GitHub Copilot**, **Claude**) across engineering teams, establishing best practices for **prompt-driven development**, **planning-first** workflows, and code validation.
- Organized internal hackathons and tech-talks focused on AI agents, driving innovation and increasing adoption of AI-powered solutions across teams.
- Designed and implemented API batching mechanism for CMAP, reducing network calls by ~90% and improving performance for Excel-integrated workloads
- Spearheaded creation of enterprise design system (EDS) used across multiple applications, improving UI consistency and development efficiency.
- Leveraged **AmCharts** and **D3.js** to develop intuitive, interactive data visualizations for complex financial datasets.
- Engineered a scalable analytics platform enabling investment analysts to efficiently monitor **portfolio performance**.
- Optimized quarterly reporting workflows, **reducing processing time** from hours to seconds, resulting in **multimillion-dollar** cost savings.

Falcon

Lead Frontend Developer

May 2020 – Oct 2023

Gurugram, India

- Helped Falcon raise **funding** of **\$2.5 M** by developing products using **Angular**, **React**, and **React Native**.
- **Optimized** the **performance** of existing Angular applications by decreasing initial **load time** from **6** to **2.5 seconds**.
- Designed and delivered multiple SaaS platform for **analyzing** and updating all finance-related data for firms.

Cybergroup

Full Stack Developer

Jan 2019 – May 2020

Noida, India

- **Won** a month-long **hackathon** in a team of 4 members, where I was responsible for the front-end using **Angular**.
- **Built Socialize**: An **analytics tool** for **social media platforms** that provides **sentiment analysis** by fetching all the posts and comments that a person receives. Moreover, it also allows the user to **schedule** posts for a future time.
- Developed a **POC** for **employee attrition analysis** for huge firms using **React**, and Material UI.
- **Automated database** tasks by **writing scripts** in **MS SQL**, **Node.js**, **SSRS**, **SSIS**, and **power-shell**.

PROJECTS

Capital Market Assumption Platform (CMAP) - Eckler

Mar 2026 – Present

- Architected and delivered a cross-platform Excel Web Add-in (Office JS + TypeScript + Vite) enabling 100% of actuaries to access Monte Carlo simulation data directly in Excel.
- Designed a function batching system consolidating Excel custom function calls into a single API request, reducing network overhead by ~90%.
- Built an Angular-based enterprise management platform with role-based modules for Assumption Sets, Asset Classes, Clients, and User Management.
- Integrated REST APIs delivering probabilistic financial datasets to enterprise clients.

Enterprise Design System (EDS) - Eckler

Mar 2026 – Present

- Architected and delivered a reusable Angular component library with 15+ standalone components and 40+ UI overrides.
- Built tokenized theming system using SCSS and CSS variables for consistent cross-application styling.
- Integrated Figma Code Connect to bridge design and development workflows.
- Developed Storybook documentation platform with accessibility auditing and interactive demos.
- Implemented CI-ready packaging and developer tooling with ng-packagr, linting, and automation.

Connect - Eckler

Oct 2023 – Oct 2025

- Developed a scalable financial analytics platform for enterprise investment analysis using **Angular**, **GraphQL**, **MySQL** and **.Net**.
- Developed a **changelog** mechanism to monitor feature updates, bug fixes, and enhancements for every release.
- Implemented a scalable **feature flag** system to dynamically control **feature deployment** across production and staging environments.

Falcon Dart Dashboard - Falcon

Jan 2022 – Oct 2023

- A **white-labelled SaaS** product that provides reports, and **analysis** on company's finances using **charts** and tables.
- Designed and developed the **end-to-end** application using Angular, Chart.js, and **Nest.js**.
- Set up the **CICD** pipeline and automated the deployment of application using **AWS**.

EDUCATION

University of Windsor

May 2022 - Aug 2023

Masters of Engineering - Electrical and Computer Engineering

Windsor, Canada

- Got selected under the **Epic Founder's program** by **Epicenter**, and was **awarded CAD \$2000** for my startup pitch
- **Relevant Courses:** Software Engineering, Data Security and Cryptography, Network Communications and security, Computational Intelligence, Engineering Project Management, Engineering Technical Communication.

Shiv Nadar University

Apr 2015 - Jan 2019

Bachelors of Technology: Electrical and Electronics Engineering

Noida, India

- Received **100% scholarship** of **CAD \$50,000** for the whole program based on my **exceptional** performance.
- **Relevant Courses:** Computer Architecture, Computer Networks, Data Structures, Algorithm Analysis, Intro to C, Intro to JAVA, Machine Learning, Embedded System Software.

PROFESSIONAL HIGHLIGHTS

- Organized internal hackathons and Tech-talks focused on AI agent, driving innovation and increasing adoption of AI-powered solutions across teams.
- Stay at the forefront of AI advancements by attending industry conferences and workshops on AI agents and developer productivity, continuously bringing new insights into engineering practices.
- Reduced financial reporting time from hours to seconds through platform optimization.
- Delivered enterprise Excel Add-in used by actuarial clients for financial modeling.
- Improved application load time by 50% across multiple frontend applications.
- Contributed to successful \$2.5M funding raise by building high-impact user-facing products.
- Solved more than **300** questions on **Leetcode** (username: tptaran)
